

Firmware Usage

The firmware version for the USB2xxxA/T Magnetometer is: MDTUSBMAG.V7B.20200110.hex

The firmware version for the USB2xxx3 Magnetometer is: MDTUSBMAG3D.V9.20220510.hex

The above, the copy of the compiled firmware provided, XLoader is a good standalone tool for writing firmware to USB Magnetometer.

In addition, The Arduino GUI along with various custom written software tools may be used for uploading firmware to USB Magnetometer.

For more information about USB Magnetometer firmware (Or requiring custom compiled USB Magnetometer firmware), please contact jim.deak@dowaytech.com.
